## Product Identification And Serial Number Plate

An individual product identification and serial number is assigned to each machine. When writing about or filling out warranty claims, use all the characters shown on the plate.

Example: M0220EA010001

M0- Factory Designation (Horicon)  
 220E- Model Or Machine Designation  
 220 E-Cut Hybrid Walk Greens Mower.  
 A- Configuration Code  
 010001- Serial Number

Example: 1M0220EA++M020001 (17-Digit)

1M0- Factory Designation (Horicon)  
 220E- Model Or Machine Designation  
 220 E-Cut Hybrid Walk Greens Mower.  
 A- Configuration Code  
 +- Random Number  
 M- Calender Year  
 020001- Serial Number

## Product Configuration Code

The configuration "alpha" code identifies a variation of a product. Example: A machine may be manufactured as a two-wheel or four-wheel drive unit, and be shipped with standard or wide cutting units; thus four variations of the same machine exist. It also identifies different products which have the same model or machine designation (a tractor and an attachment tiller may have the same model numbers). If no configuration "alpha" code is required, space is filled in with an "X".

## Serial Number Listing Information

Serial number information is listed to show on which machines each part can be used; for example:

|                 |                                                                                  |
|-----------------|----------------------------------------------------------------------------------|
| -               | The part can be used on all products.                                            |
| 000000 -        | The part can be used on products beginning with the serial number listed.        |
| - 000000        | The part can be used on products up to and including the serial number listed.   |
| 000000 - 000000 | The part can be used on products between and including the serial number listed. |

When XXXXXX's are listed in place of a serial number, a serial number change was made, but the exact serial number was not available at the time of publication.

## **To The Customer**

The part numbers in this Parts Catalog were correct at the time of publication. Per John Deere policy, we continuously improve our products. Therefore, when ordering parts verify the part numbers with your dealer.

## **SI Units of Measure**

Metric dimensions are provided as applicable throughout this parts catalog.

## **Bolt And Cap Screw Strength Identification**

Bolts and cap screws required to have high-strength qualities equivalent to metric property class 10.9 (SAE grade 8) or higher are identified throughout this catalog by the description 10.9, 12.9 or 14.9. All standard bolts and cap screws are metric property class 8.8 (SAE grade 5) or lower.

## **Illustrations**

Illustrations in this catalog are only intended as a reference for dealers and customers. These illustrations do not necessarily represent the exact view of the parts.

## **Box-Enclosed Illustrations**

Box-enclosed keyed parts in the illustration are available as a service assembly or an attachment. These parts may also include parts not available for service. The illustrations may not show all individual parts of an attachment. A box not keyed includes non-current parts.

## **Orientation Of Product**

An arrow shown with an illustration is to indicate the direction of product forward travel. Right Hand (RH) and Left Hand (LH) sides are determined by product forward travel.

## **Orientation of Engine**

Right Hand (RH) and Left Hand (LH) sides are determined by standing at flywheel and facing the engine.

## **John Deere Remanufactured Components**

The REMAN parts listed in this catalog are intended for the repair or replacement of failed or worn original equipment components. John Deere Reman components are manufactured to stringent John Deere standards and produced to original John Deere specifications that incorporates the latest design and performance improvement updates.

## Identification de produit et plaque constructeur

Une identification de produit et un numéro de série sont attribués à chaque machine. Inclure l'ensemble des caractères visibles sur la plaque en écrivant au sujet d'une réclamation sous garantie ou en remplissant celle-ci.

Exemple: M0220EA010001

M0- Désignation d'usine (Horicon)  
 220E- Désignation de modèle ou de machine  
 Tondeuse de green à pousser hybride E-Cut 220.  
 A- Code de configuration  
 010001- Numéro de série

Exemple: 1M0220EA++M020001 (17 chiffres)

1M0- Désignation d'usine (Horicon)  
 220E- Désignation de modèle ou de machine  
 Tondeuse de green à pousser hybride E-Cut 220.  
 A- Code de configuration  
 +- Nombre au hasard  
 M- Année civile  
 020001- Numéro de série

## Code de configuration produit

Le code de configuration "alpha" signale qu'il s'agit d'une variation de produit. Exemple: une machine fabriquée en tant qu'unité à deux ou quatre roues motrices, puis expédiée avec des unités de coupe standard ou large; donc, il existe quatre variations de la même machine. Il sert aussi à identifier différents produits ayant la même désignation de modèle ou de machine. (Un tracteur et un cultivateur-accessoire peuvent avoir le même numéro de modèle.) Si aucun code de configuration "alpha" n'est nécessaire, un "X" figure dans ce champ.

## Informations concernant la liste des numéros de série

Le numéro de série est donné dans la liste pour indiquer sur quelles machines chaque pièce peut être utilisée.

- La pièce peut être utilisée sur tous les produits.
- 000000 - La pièce peut être utilisée sur tous les produits à partir du numéro de série indiqué.
- 000000 La pièce peut être utilisée sur tous les produits jusqu'au numéro de série indiqué inclus.
- 000000 - 000000 La pièce peut être utilisée sur tous les produits entre les numéros de série indiqués inclus.

Le XXXXXX à la place du numéro de série signale que celui-ci a été modifié mais que le nouveau numéro de série n'était pas encore disponible au moment de la publication du catalogue.

## Au client

Les numéros de référence dans ce catalogue de pièces étaient corrects au moment de la publication. Chez John Deere, notre politique est celle d'une amélioration continue des produits que nous fabriquons. Lors de la commande de pièces, il est donc recommandé de vérifier les numéros de référence auprès du concessionnaire.

## Unités de mesure SI

Les dimensions sont données en unités métriques, le cas échéant, dans ce catalogue pièces.

## Identification de la résistance des boulons et des vis

Les boulons devant présenter des caractéristiques de haute résistance de qualité au moins équivalente à la classe de propriété métrique 10,9 (catégorie SAE 8) sont identifiés tout au long de ce catalogue par la description 10,9, 12,9 ou 14,9. Tous les boulons standard sont de classe de propriété métrique 8,8 (catégorie SAE 5) ou inférieure.

## Illustrations

Les illustrations de ce catalogue ne sont fournies qu'à titre de référence pour les concessionnaires et les clients. Ces illustrations ne sont pas forcément une reproduction exacte de la vue des pièces.

## Illustrations encadrées

Les pièces indiquées avec un numéro de légende dans l'encadré sont disponibles en tant qu'ensemble de rechange ou accessoire. Ces pièces peuvent aussi comporter des pièces non disponibles pour l'entretien. Il se peut que toutes les pièces d'un accessoire ne figurent pas dans une illustration. Un encadré sans légende contient des pièces périmées.

## Orientation du produit

Les flèches sur certaines illustrations désignent le sens de marche avant du produit. Les côtés droit et gauche sont déterminés par rapport au sens de marche avant du produit.

## Orientation du moteur

Les côtés droit et gauche sont déterminés en se mettant devant le volant-moteur et en faisant face au moteur.

## Composants réusinés John Deere

Les pièces de REMAN répertoriées dans ce catalogue sont destinées à la réparation ou au remplacement de composants d'équipement d'origine qui sont cassés ou usés. Les composants John Deere Reman sont fabriqués selon les normes strictes de John Deere et de manière à être conformes aux spécifications d'origine John Deere comprenant les dernières améliorations apportées à la conception et en termes de rendement.

## Produktidentifikations- und Seriennummernschild

Jeder Maschine wird eine individuelle Produktidentifikation und Seriennummer zugewiesen. Beim Schreiben über bzw. Ausfüllen von Garantieforderungen müssen alle auf dem Schild angegebenen Zeichen verwendet werden.

Beispiel: M0220EA010001

M0- Werksbezeichnung (Horicon)  
 220E- Modell- oder Maschinenbezeichnung  
 Handgeführter Greens-Mäher 220 E-Cut Hybrid  
 A- Konfigurationscode  
 010001- Seriennummer

Beispiel: 1M0220EA++M020001 (17-stellig)

1M0- Werksbezeichnung (Horicon)  
 220E- Modell- oder Maschinenbezeichnung  
 Handgeführter Greens-Mäher 220 E-Cut Hybrid  
 A- Konfigurationscode  
 +- Zufallszahl  
 M- Kalenderjahr  
 020001- Seriennummer

## Produktkonfigurationscode

Der Konfigurationscode "alpha" kennzeichnet eine Ausführung eines Produkts. Beispiel: Eine Maschine kann beispielsweise als Zweirad- oder Allradantriebseinheit gefertigt und mit standardmäßigen oder breiten Mähwerken geliefert werden; deshalb gibt es vier Ausführungen der gleichen Maschine. Der Code kennzeichnet außerdem verschiedene Produkte, die über die gleiche Modell- bzw. Maschinenbezeichnung verfügen (ein Traktor und ein Bodenbearbeitungsgerät können die gleichen Modellnummern aufweisen). Wenn kein Konfigurationscode "alpha" erforderlich ist, wird der Freiraum mit einem "X" gefüllt.

## Aufgeführte Seriennummerninformationen

Die Seriennummerninformationen werden aufgeführt, um anzugeben, an welchen Maschinen jedes Teil verwendet werden kann. Beispiel:

|               |          |                                                                                                                |
|---------------|----------|----------------------------------------------------------------------------------------------------------------|
|               | -        | <b>Das Teil kann an allen Produkten verwendet werden.</b>                                                      |
| <b>000000</b> | -        | <b>Das Teil kann an Produkten verwendet werden, die mit der aufgeführten Seriennummer beginnen.</b>            |
|               | - 000000 | <b>Das Teil kann an Produkten bis zu und einschließlich der aufgeführten Seriennummer verwendet werden.</b>    |
| <b>000000</b> | - 000000 | <b>Das Teil kann an Produkten zwischen und einschließlich der aufgeführten Seriennummern verwendet werden.</b> |

Wenn XXXXXX anstelle einer Seriennummer angegeben wird, wurde eine Seriennummeränderung durchgeführt, aber die genaue Seriennummer war zum Zeitpunkt der Veröffentlichung nicht verfügbar.

## Targhetta numero di identificazione prodotto e di matricola

A ciascuna macchina viene assegnato un singolo numero di identificazione prodotto e di matricola. Quando si redige o si compila una richiesta di rimborso in garanzia, usare tutti i caratteri riportati sulla targhetta.

Esempio: M0220EA010001

M0- Designazione fabbrica (Horicon)  
 220E- Designazione modello o macchina  
 Tosaerba a spinta da green ibridi E-Cut 220.  
 A- Codice di configurazione  
 010001- Numero di matricola

Esempio: 1M0220EA++M020001 (a 17 cifre)

1M0- Designazione fabbrica (Horicon)  
 220E- Designazione modello o macchina  
 Tosaerba a spinta da green ibridi E-Cut 220.  
 A- Codice di configurazione  
 +- Numero casuale  
 M- Anno solare  
 020001- Numero di matricola

## Codice di configurazione prodotto

Il codice di configurazione "alpha" identifica una variazione in un prodotto. Esempio: una macchina può essere costruita come unità a due ruote motrici o a trazione integrale ed essere dotata di unità di taglio standard o larghe; pertanto esistono quattro variazioni della stessa macchina. Inoltre, identifica diversi prodotti con la stessa designazione di modello o macchina (un trattore e un attrezzo erpice possono avere gli stessi numeri di modello). Se non occorre alcun codice di configurazione "alpha", lo spazio viene compilato con una "X".

## Informazioni sui numeri di matricola

Le informazioni sui numeri di matricola mostrano su quale macchina può essere usato ciascun componente; ad esempio:

|                 |                                                                                                     |
|-----------------|-----------------------------------------------------------------------------------------------------|
| -               | Il componente può essere usato su tutti i prodotti.                                                 |
| 000000 -        | Il componente può essere usato sui prodotti a partire dal numero di matricola indicato.             |
| - 000000        | Il componente può essere usato sui prodotti fino al numero di matricola indicato incluso.           |
| 000000 - 000000 | Il componente può essere usato sui prodotti compresi tra i numeri di matricola indicati ed inclusi. |

Se è presente XXXXXX al posto del numero di matricola significa che è stata effettuata una modifica, ma il numero di matricola esatto non era disponibile al momento della stesura del catalogo.

## **Informazioni per il cliente**

I codici ricambio indicati nel presente catalogo ricambi erano corretti alla data di pubblicazione del catalogo stesso. Come da politica John Deere, continuiamo a migliorare i nostri prodotti. Pertanto, per l'ordinazione dei componenti, verificare i codici ricambio con il concessionario.

## **Unità di misura del sistema internazionale**

In questo catalogo ricambi vengono forniti valori metrici, ove applicabili.

## **Identificazione della resistenza della viteria**

La viteria dotata di proprietà di resistenza elevate equivalenti a 10.9 in caso di classe metrica (SAE grado 8) o valore superiore è identificata nel presente catalogo mediante l'indicazione 10.9, 12.9 o 14.9. Tutta la viteria standard è pari o inferiore a 8.8 in caso di classe metrica (SAE grado 5).

## **Illustrazioni**

Le illustrazioni presenti in questo catalogo vengono fornite esclusivamente a scopo di riferimento per rivenditori e clienti. Dette illustrazioni non rappresentano necessariamente l'aspetto effettivo dei componenti.

## **Illustrazioni racchiuse in un riquadro**

I componenti numerati racchiusi in un riquadro nell'illustrazione sono disponibili come gruppo ricambi o attrezzo. Inoltre, tali componenti possono includere pezzi non disponibili per la manutenzione. Le illustrazioni non sempre mostrano tutti i componenti di un attrezzo. Un riquadro non numerato include componenti non attuali.

## **Orientamento del prodotto**

La freccia riportata in una figura indica il senso di avanzamento del prodotto. I lati destro (dx) e sinistro (sx) si intendono riferiti al senso di avanzamento del prodotto.

## **Orientamento del motore**

I lati destro (dx) e sinistro (sx) si intendono sostando presso il volano e rivolti verso il motore.

## **Componenti ricondizionati John Deere**

I ricambi RICONDIZ. elencati in questo catalogo sono destinati alla riparazione o sostituzione di componenti delle attrezzature originali difettosi o usurati. ## Chapa de número de identificación de producto y de número de serie

Se asigna un número de identificación de producto y un número de serie individuales a cada máquina. Al redactar o completar reclamos de garantía, usar todos los caracteres que figuran en la chapa.

Ejemplo: M0220EA010001

M0- Designación de fábrica (Horicon)  
 220E- Designación de modelo o máquina  
 Cortacésped para greens 220 E-Cut híbrido con operador a pie.  
 A- Código de configuración  
 010001- Número de serie

Ejemplo: 1M0220EA++M020001 (17-Digit)

1M0- Designación de fábrica (Horicon)  
 220E- Designación de modelo o máquina  
 Cortacésped para greens 220 E-Cut híbrido con operador a pie.  
 A- Código de configuración  
 +- Número aleatorio  
 M- Año calendario  
 020001- Número de serie

## Código de configuración del producto

El código de configuración "alfa" identifica una variación del producto. Ejemplo: La máquina puede fabricarse con tracción en dos o cuatro ruedas y despacharse con unidades de corte estándar o anchas; por lo tanto, existen cuatro variaciones de una misma máquina. También identifica productos distintos con la misma designación de modelo o máquina (un tractor con un accesorio de cultivadora pueden tener los mismos números de modelo). Si no se necesita un código "alfa", el espacio se completa con una "X".

## Información de lista de número de serie

La información de número de serie se lista para indicar las máquinas en las cuales se puede usar la pieza; por ejemplo:

|                               |                                                                                             |
|-------------------------------|---------------------------------------------------------------------------------------------|
| -                             | <b>La pieza puede usarse en todos los productos.</b>                                        |
| <b>000000</b> -               | <b>La pieza puede usarse en los productos a partir del número de serie listado.</b>         |
| - <b>000000</b>               | <b>La pieza puede usarse en los productos hasta e inclusive el número de serie listado.</b> |
| <b>000000</b> - <b>000000</b> | <b>La pieza puede usarse en los productos entre e inclusive el número de serie listado.</b> |

Cuando XXXXXX aparece en lugar de un número de serie, quiere decir que se modificó el número de serie, pero el número de serie preciso no estaba disponible al momento de la publicación.

## Produktidentifierings- och serienummerplåt

Ett individuellt produkt- och serienummer har tilldelats varje maskin. I korrespondens som gäller garantin eller vid ifyllningen av garantianspråk måste alla tecken på plåten användas.

Exempel: M0220EA010001

M0- Fabriksbeteckning (Horicon)  
 220E- Modell- eller maskinbeteckning  
 220 E-Cut gångmanövrerad hybridgreenklippare.  
 A- Utförandekod  
 010001- Serienummer

Exempel: 1M0220EA++M020001 (17 tecken)

1M0- Fabriksbeteckning (Horicon)  
 220E- Modell- eller maskinbeteckning  
 220 E-Cut gångmanövrerad hybridgreenklippare.  
 A- Utförandekod  
 +- Slumpnummer  
 M- Kalenderår  
 020001- Serienummer

## Produktutförandekod

Utförandekoden "alpha" identifierar en produktvariation. Exempel: En maskin kan vara tillverkad som en två- eller fyrhjulsdriven enhet och levereras med standard eller breda klippenheter. Fyra variationer finns alltså tillgängliga för samma maskin. Koden identifierar även olika produkter som har samma modell- eller maskinbeteckning (en traktor och ett plogtillbehör kan ha samma modellnummer). Om ingen "alpha"-kod behövs anges ett "X" i fältet.

## Upptagen serienummerinformation

Serienummerinformationen upptas för att visa vilka maskiner reservdelen kan användas på, exempelvis:

- **Reservdelen kan användas på alla produkter.**
- 000000** - **Reservdelen kan användas på produkter som börjar med det upptagna serienumret.**
- **000000** **Reservdelen kan användas på produkter t.o.m. det upptagna serienumret.**
- 000000** - **000000** **Reservdelen kan användas på produkter mellan och inklusive de upptagna serienumren.**

När XXXXXXXX anges istället för ett serienummer har serienumret ändrats, men det nya serienumret var inte tillgängligt när katalogen trycktes.

## **Till kunden**

Numren i denna reservdelskatalog var korrekta när katalogen trycktes. I enlighet med John Deeres policy förbättrar vi konstant våra produkter. Bekräfta därför numren med din återförsäljare vid beställning av reservdelar.

## **SI-måttenheter**

Metrisk mått visas i denna reservdelskatalog där de är tillämpliga.

## **Hållfasthetsidentifiering för bultar och skruvar**

Bultar och skruvar, som kräver samma hållfasthet som metrisk klass 10.9 (SAE-klass 8) eller högre, identifieras i denna katalog genom beskrivningen 10.9, 12.9 eller 14.9. Alla standardbultar och -skruvar är av metrisk klass 8.8 (SAE-klass 5) eller lägre.

## **Illustrationer**

Illustrationerna i denna katalog är endast avsedda som referens för återförsäljare och kunder. Illustrationerna utgör inte alltid en exakt bild av delarna.

## **Bilder i rutor**

Referensnumrerade delar på bilden, som visas i särskilda rutor, är tillgängliga som en serviceenhet eller ett tillbehör. Dessa enheter kan också inkludera delar som inte är tillgängliga för service separat. Bilderna visar eventuellt inte alla enskilda delar i ett tillbehör. En ruta utan referensnummer inkluderar delar som inte är uppdaterade.

## **Produktens orientering**

En pil indikerar produktens körriktning framåt. Beteckningarna "höger" och "vänster" gäller sett i maskinens körriktning framåt.

## **Motorns inriktning**

Avgör "höger" och "vänster" genom att stå vid svänghjulet och titta mot motorn.

## **John Deeres omarbetade komponenter**

De omarbetade reservdelarna som är upptagna i denna katalog är avsedda för reparation eller byte av utrustningens originalkomponenter. John Deeres omarbetade komponenter är tillverkade efter John Deeres stränga standarder och har producerats efter John Deeres originalspecifikationer som omfattar de senaste uppdaterade utformnings- och prestationsförbättringarna.
